

Healthcare Technology

Your hospital runs on decisions.

Lifetrenz makes every decision smarter.

dWise is a healthcare IT company built exclusively for the complexities of modern care delivery. Our platform, Lifetrenz, unifies clinical, operational, and financial workflows so hospital leaders gain real control not just visibility.

 **15+**

Years exclusively in healthcare technology

 **5**

Integrated product lines across the continuum

 **99%**

Platform uptime, with 24/7 support coverage

SOC 2 Type 2 Certified

ISO/IEC 27001:2022 Certified

CMMI Maturity Level 3

ISO 9000:2015 Certified

WHO WE ARE

A thinking organization **built for healthcare.**

Founded in 2009, dWise Healthcare IT Solutions has spent over 15 years doing one thing: solving the hardest technology problems in healthcare. We are not a generic software firm that added a hospital module. Every engineer, product decision, and support interaction is shaped by healthcare domain experts including physicians, nurses, pharmacists, and allied health professionals ensuring everything we build is healthcare-focused.

Our flagship platform, Lifetrenz, is trusted by hospitals, clinic chains, and diagnostic networks across India and the UAE and built to scale with the ambitions of modern healthcare enterprises.

 Our flagship platform

 Built for Healthcare

dWise Healthcare IT Solutions

Trusted by leading names in healthcare

Aster DM Healthcare

Multi-facility deployment

Cloudnine Hospital Group

Chain-wide EHR rollout

UniCare Medical Centre

full HIS +RCM implementation

Kangaroo Care

women & children specialty workflows

Mangal Anand Hospital

end-to-end digital transformation

"Most hospital software forces you to manage the software. Lifetrenz is built so the software manages the complexity and your teams focus on patients."

dWise Healthcare IT Solutions Product Philosophy

THE CHALLENGE EVERY HEALTHCARE ORGANIZATION FACES

Fragmented systems cost you more than you realize.

Revenue leakage

Unbilled services, failed claims, and delayed collections drain 8-15% of potential revenue often invisibly.

Data in silos

Clinical, financial, and operational data spread across 4-7 disconnected systems means leaders decide blind.

Compliance risk

Manual documentation and disconnected audit trails expose hospitals to accreditation and regulatory vulnerabilities.

The Lifetrenz Platform

One connected ecosystem. Every workflow, unified.

HIS + EHR + ERP + RCM in one platform

Lifetrenz is not a suite of separate tools bolted together. It is a single, cloud-native platform built on micro services architecture meaning your patient registration, clinical documentation, pharmacy, billing, insurance claims, and analytics all share one data layer. **No reconciliation. No gaps. No excuses.**

Lifetrenz Hospital
Unified HIS + EHR + ERP for all hospital sizes

The flagship platform for hospitals. Covers every workflow from patient registration and OPD consultations to OT management, diagnostics, nursing, billing, and inventory in one connected digital backbone.

- OPD · IPD · Emergency
- AI-assisted documentation
- Clinical decision support
- Pharmacy & lab integration
- Longitudinal EHR

Lifetrenz RCM
Automated revenue cycle, zero-denial approach

Built around a proactive zero-denial framework — catching billing, coding, and authorization issues before claims are submitted. Reduces manual rework, cuts AR aging, and improves cash flow systematically.

- Claim scrubbing & validation
- Insurance workflows
- AR tracking & follow-up
- Denial reduction
- Payer contract management

Lifetrenz Diagnostics
LIS + RIS for labs and radiology networks

Purpose-built for high-volume diagnostic operations. Manages the full journey from sample registration to result delivery, with analyzer integration, PACS connectivity, compliance logging, and AI-assisted reporting.

- Sample tracking
- Analyzer integration
- Radiology & PACS
- Workload forecasting

Lifetrenz Clinic
Smart CMS + EHR for clinic chains & OPD networks

Designed for individual clinics and multi-branch networks. Manages appointments, consultations, prescriptions, billing, and patient records — with AI capabilities for demand forecasting, referral routing, and multilingual support.

- Multi-branch operations
- E-Prescription
- Revenue workflows
- AI demand forecasting

Lifetrenz HomeKare
Extending connected care beyond hospital walls

Enable home nursing, physiotherapy, medication management, wound care, and virtual consultations through one secure platform — connected to your hospital's clinical record. Reduce avoidable readmissions and expand your care revenue without expanding your facility.

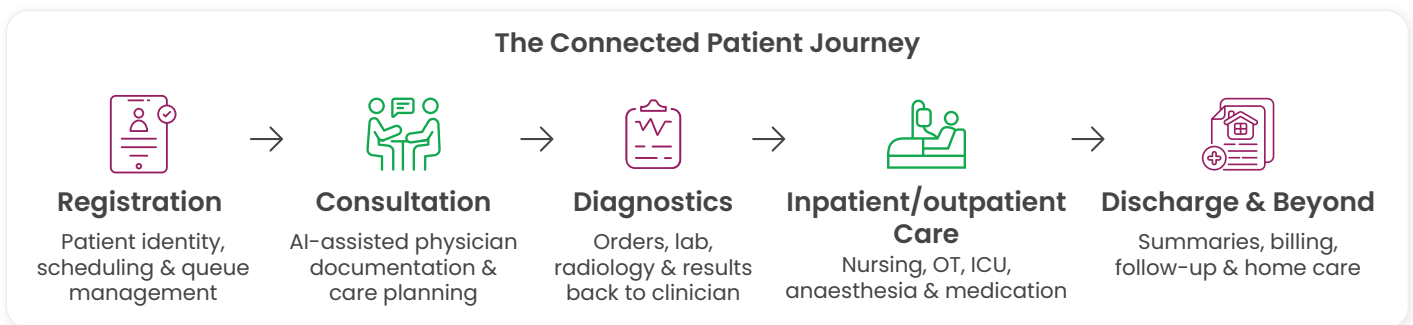

- Remote patient monitoring
- Virtual consultations
- Lab sample collection
- Care team coordination
- Early warning alerts

Patient-centric workflows

Safer care. Smarter decisions. **Less friction for your teams.**

Lifetrenz brings every clinical stakeholder doctors, nurses, departments, and patients around a single connected patient record. From the moment a patient registers to discharge and beyond, every step is documented, tracked, and informed by real-time clinical intelligence.

Key capabilities

<p>OPD, IPD & Day Care</p> <p>Full outpatient and inpatient workflow management queues, beds, transfers, and care team assignments in one unified view.</p>	<p>Emergency Management</p> <p>Triage, rapid registration, real-time bed status, and critical care alerts purpose-built for high-acuity, time-sensitive environments.</p>	<p>AI-Assisted Documentation</p> <p>Voice-enabled NLP physician notes and nursing records. Clinicians spend less time documenting, more time with patients.</p>
<p>E-Prescription & Pharmacy</p> <p>Digital prescriptions flow directly to pharmacy. Drug interaction checks, allergy alerts, and dispensing records close the medication loop safely.</p>	<p>OT, Anaesthesia & ICU Care</p> <p>Theatre scheduling, pre-op checklists, intraoperative records, and ICU monitoring integrated with the longitudinal patient record.</p>	<p>Clinical Decision Support</p> <p>Evidence-based alerts, care pathway guidance, and real-time insights surfaced at the point of care reducing preventable errors before they happen.</p>
<p>Specialty Care Pathways</p> <p>Configurable templates and structured care pathways for cardiology, oncology, maternity, orthopaedics, and more built to specialty clinical standards.</p>	<p>Lab & Radiology Integration</p> <p>Orders placed at the bedside, results returned directly to the treating physician. No manual follow-up. No lost reports. No delays in care decisions.</p>	<p>Longitudinal Health Record</p> <p>A single, lifelong patient record accessible across departments, facilities, and care settings standards-compliant and interoperable.</p>

Document better. Decide faster. Reduce duplication. Deliver safer care.

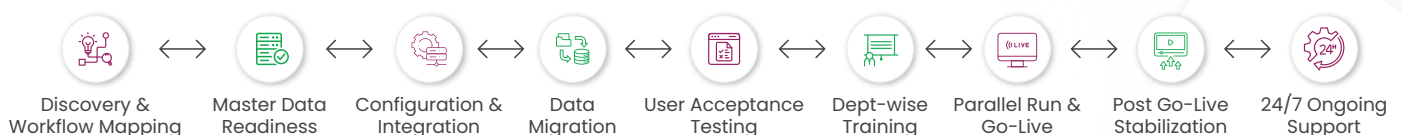

Lifetrenz EHR is

- ✓ Standalone deployable
- ✓ Third-party HIS integrable
- ✓ Standards-compliant

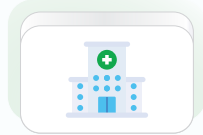

Implementation & Training

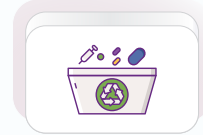

A structured approach from discovery to go-live and beyond.

Key Modules

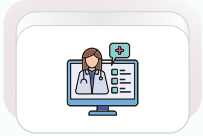

Multi-location / Enterprise Operations

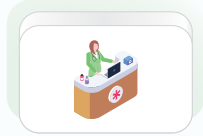

Biomedical Waste Management

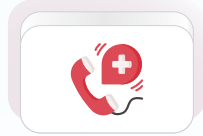

AI & Decision Support Features

OPD Nursing & Physician Consult

Front Desk & Help Desk Management

Technology

Cloud-Native. Secure. Always Connected.

Microservices

Kubernetes orchestration & containerised deployments

Interoperable

HL7, FHIR & open APIs connects labs, payers & devices

AI-Ready

Real-time streaming, event-driven alerts & live dashboards

Zero Downtime

Blue-green releases, auto-scaling cloud, hybrid or on-premise

Why dWise

The outcomes your board expects. The partnership your teams deserve.

ROI from Day One

Modular, scalable pricing means you invest in what you need now and expand as you grow. Most clients recover implementation costs within the first year through reduced revenue leakage and operational savings.

One Vendor. One Truth.

Replace 5-7 fragmented point solutions with a single integrated platform. Eliminate reconciliation overhead, reduce vendor dependencies, and give your leadership team one source of operational truth.

Built for Scale

Cloud-native microservices architecture with Kubernetes orchestration means the platform grows with you single hospital today, multi-state network tomorrow. Zero-downtime upgrades. Auto-scaling. Always on.

AI That Works in Practice

Embedded AI for clinical decision support, predictive analytics, NLP documentation, voice interfaces, and operational forecasting — not promised as a future roadmap, but live in current deployments.

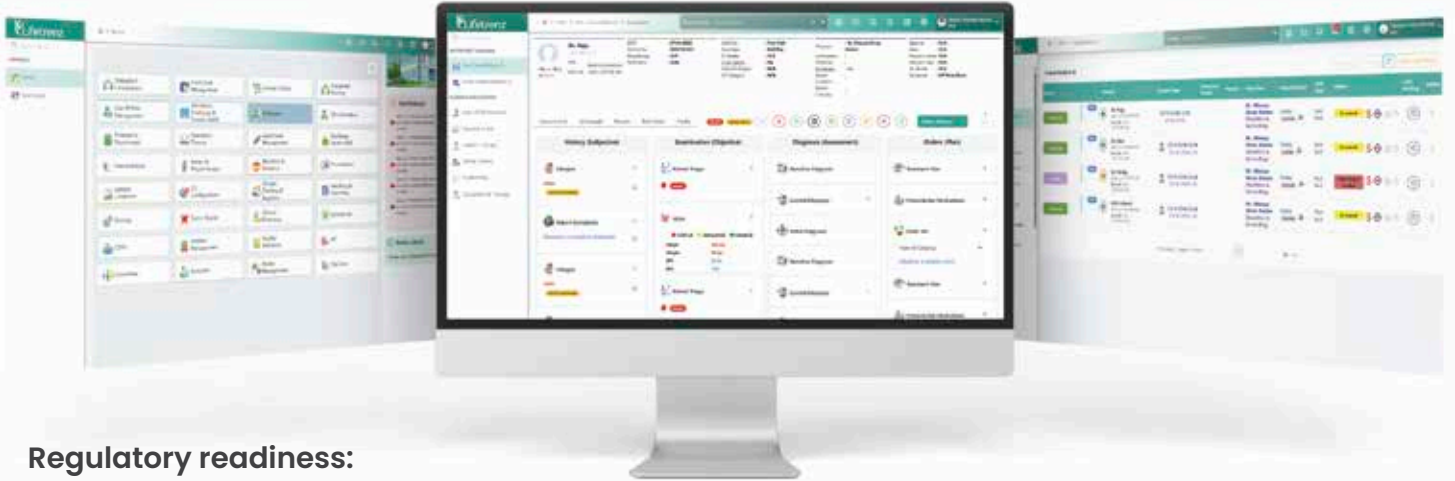

Quality & Compliance Ready by Design

Lifetrenz ensures quality and compliance with NABH, JCI, HIMSS-ready workflows, structured documentation, access, audit trails, safety checks, interoperability, dashboards improving governance, readiness, and patient safety.

Partnership, Not Just Support

Dedicated account managers, 24/7 L1-DevOps support escalation, multilingual assistance, and structured implementation with clinical domain experts who understand your workflows, not just your tickets.

Regulatory readiness:
